24 HOURS

FINAL ATTACHMENT!!!

- ADVANTAGES:**
- Enjoy a better fit and a more natural appearance
 - Restore your self esteem and confidence in your smile
 - Eat what you want while avoiding any denture adhesives
 - Enjoy a stronger bite and far greater comfort
 - Easy to keep clean via Snap-On & Snap-Off Technology
 - Improve the quality of your life
- DISADVANTAGES:**
- Not immediately loaded – Need to wait approximately 7 months for complete Implant healing

I understand that this sheet serves only as a guide for the typical workflow for Snap-On Overdenture Treatment. I understand that each case is different as all mouths have different sizes and shapes. I understand that sometimes unforeseen complications or concerns may arise. They may affect the time between appointments and / or total time until final attachment. I understand that these complications may also influence the steps involved.
